**Transient transfection of macrophage migration inhibitory factor small interfering RNA disrupts the biological behavior of oral squamous carcinoma cells**

JIE ZENG, JINGJING QUAN and XUEFENG XIA

Mol Med Rep 13: 174-180, 2015; DOI: 10.3892/mmr.2015.4525

Due to an inability to contact various of the contributors to this study at the time of submission and a desire to publish this work, the published article did not include the full complement of authors who should have been credited on the paper.

All of the existing authors have agreed that the following authors, whose names were omitted, should also have been included as co-authors: Professor Jin Gao (now at the School of Dentistry and Oral Health, Griffith University, Queensland, Australia), who was involved with project design and revisions of the manuscript; Dr Shuyu Luo (now at the School and Hospital of Stomatology, Tianjin Medical University, Tianjin, China), who was involved in project development, data collection (Figs 3 and 6) and manuscript writing; and Dr Jianming Zhang (now at the Department of Stomatology, General Hospital of Tianjin Medical University, Tianjin, China), who was involved in project development, data collection and analysis (Fig. 4)

The full author list for this paper is presented below, showing the corrected order of the authors as they should have appeared on the paper. We regret the omission of the three aforementioned authors on the published article. Note that Professor Jin Gao should be considered as the co-corresponding author (with Xuefeng Xia), and Jie Zeng and Shuyu Luo contributed equally to this study.
