

Figure S1. Association between DSS time with FBXW7 expression in different types of cancer. DSS was analysed using the Sangerbox tool. The box highlights the association between the DSS time of patients with colon adenocarcinoma and FBXW7 expression. FBXW7, F-box and WD repeat domain containing 7; DSS, disease-specific survival; HR, hazard ratio.

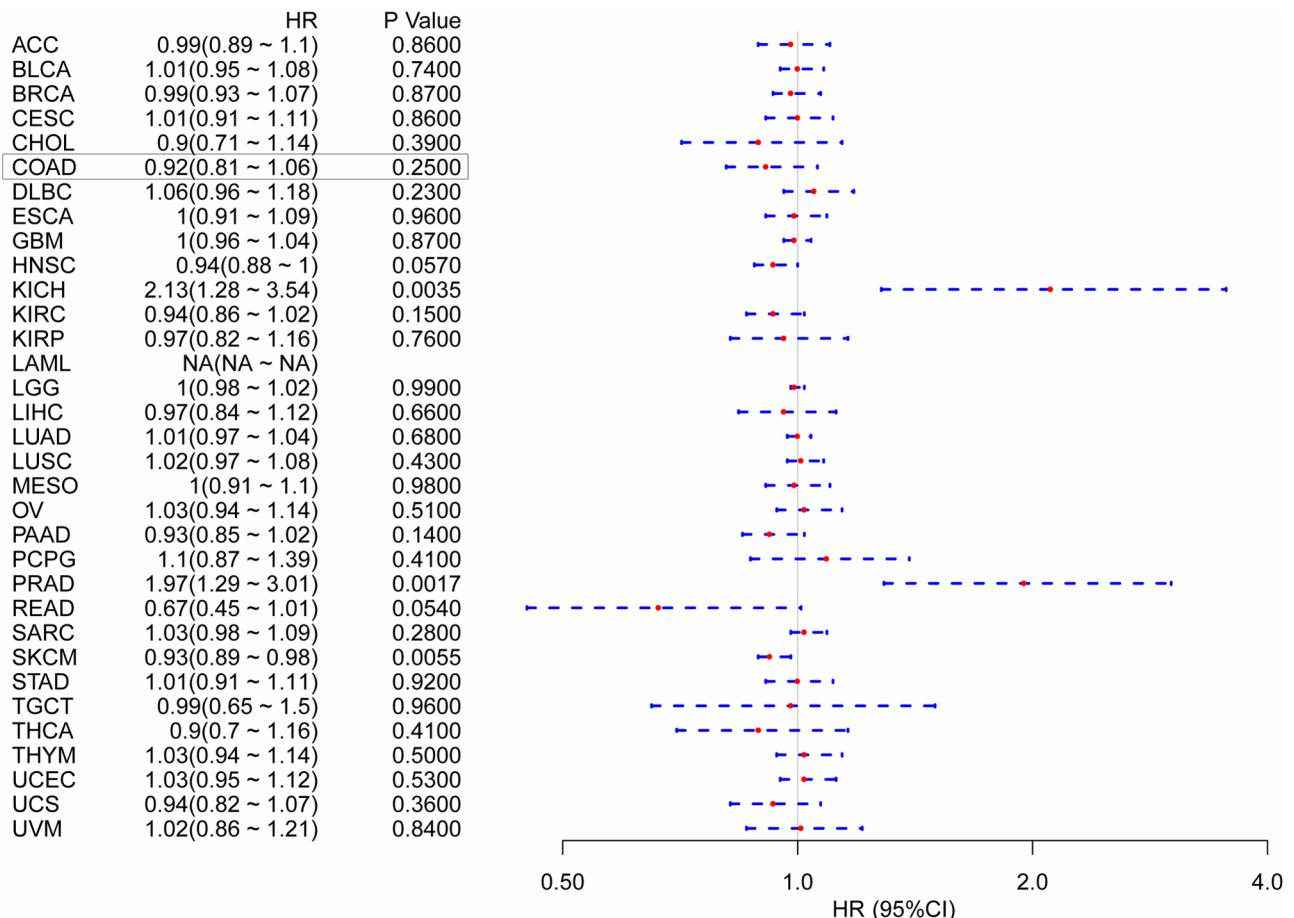

Figure S2. Association between OS time with FBXW7 expression in different types of cancer. OS was analysed using the Sangerbox tool. The box indicates the association between the OS time of patients with colon adenocarcinoma and FBXW7 expression. FBXW7, F-box and WD repeat domain containing 7; OS, overall survival; HR, hazard ratio.
